Metatech VP2

Low Viscosity Vanishing Oil

Product Description

Pennine Metatech VP2 is a high performance, low odour and low viscosity metalworking fluid primarily designed for use in punching, pressing and spinning operations of both ferrous and non-ferrous metals. The product incorporates added lubricity additives to aid performance and ensure good component finish. Metatech VP2 is an extremely low viscosity product which dries off quickly leaving minimal residue on components and tooling.

Applications

Metatech VP2 is suitable for use in light to moderate duty punching, pressing, and forming applications on low gauge materials. The product is suitable for use on a variety of ferrous and non-ferrous materials including copper and aluminium. The low odour, low viscosity and almost colourless formulation provides excellent cleanliness and a pleasant working environment.

Typical Test Data

Density @ 15°C	0.79
K. V. @ 40°C cSt	1.8
Flash Point °C	65

Availability

Pennine Metatech VP2 is available in bulk, 1000 litre IBC's, 205 litre barrels, 25 litre drums and 5 litre plastic bottles.

Storage

Barrels of lubricant should always be stored in such a way that will prevent the ingress of water when stored in the open.

Health & Safety

Please refer to the relevant Health and Safety Data Sheet, a copy of which is freely available to all our customers.

Data represented is typical of that obtained with normal production tolerances and does not constitute a specification. The policy of Pennine Lubricants is one of continual improvement; we therefore reserve the right to change specifications without notice.
